

Exposure Rack

Direct exposure testing is a common test method that can be applied to paints, inks, plastics or other outdoor end products. Most of the test samples can be easily installed on the XD-746/747 rack. Our direct exposure rack kits meet the requirements of ISO 877-2 Method A, ASTM G7, ASTM D4141 or SAE J1976 for exposure testing.

Specific technical parameters according to customer requirements different customization.

Technical Specification

Model	XD-746	XD-747
Specification	2M	3M
Material	Corrosion-resistant aluminum profile	
Dimensions (mm)	2000*1550*1450	3000*1550*1450
One-time exposure standard sample 150×70mm	184 piece	280 piece
